

## Your Eyes are Playing Tricks on You!

Join us for a discussion on illusions in flight, how to identify them and how to manage them. This class will cover information from AIM section 8-1-5 and PHAK Chapter 17 and discuss accidents found to have been linked to illusions in flight. Recommended for pilots of all levels as a source of new information or a refresher to help keep you safe in the sky!

**Directions:** Please come straight back as you walk through our front door. The classroom is about halfway down the left side of the main hallway. Prior to attending a safety seminar, please review and abide by current CDC, State and Local health guidelines.

### A message from the National FAASTeam Manager
